

## The Problem

Mosquitoes and other biting insects keep you and your family from enjoying the outdoors. Since the introduction of West Nile Encephalitis, the once simply annoying mosquito has become a serious health threat. Messy sprays, smelly candles or propane devices, that actually attract mosquitoes have been your only line of defense - and you usually end up having to go inside anyway. Until now...

## The Solution

The **BuzzOFF** solution is a pyrethrum botanical insecticide which is water-based and biodegradable.

Pyrethrum is derived from the natural plant oils of the Chrysanthemum daisy flower. Pyrethrum is one of the few insecticides certified for use on organic farms. Shortly after the mist sprays, the pyrethrum is rapidly degraded by sunlight, and leaves the yard free of residue.

## The System

The **BuzzOFF** Mosquito System breaks the insects breeding cycle by killing mature insects and prevents them from laying their eggs. The solution is applied automatically to the protective zone as a fine mist at pre-set intervals which kills mosquitoes and other insects on contact.

## Guarantee

Every **BuzzOFF** Mosquito System is designed to give our customers complete satisfaction. That is why we offer a no questions asked...

*“The Automatic Solution to Your  
Insect Control Problems.”*

If you enjoy the outdoors, you will love our **BuzzOFF Mosquito System**. You no longer have to let the nuisance of insects or the fear of mosquito borne viruses keep you and your family from enjoying your beautiful yard during the best times of the year.

The **BuzzOFF Mosquito misting system** effectively and automatically attacks the pests before they can attack you. The **BuzzOFF** system mists a pyrethrum-based solution around your home or any chosen area at predetermined intervals to aid in the control of mosquitoes and other biting insects. Our remote control feature allows you to make additional applications as needed.

*“It’s your yard. Enjoy it!”*

## Installation/Service

**BuzzOFF Mosquito** approaches your problem on an individualized basis. No one solution fits all situations. Our technicians have been professionally trained in various techniques that yield a virtually invisible, yet effective, system allowing you to enjoy the full beauty of your home.

Ongoing service is provided by registered technicians so you can be assured that the botanical insecticide is applied effectively. Every 6 to 8 weeks, we will come on-site to completely inspect and service your system.

**Don't let something as small as a  
mosquito keep you from the  
important things in life.**
